WORK EXPERIENCE

Photographer, Editor & Cinematographer

Kevin T McHugh Photography

2010 - Present

Conceptualize, brainstorm and storyboard for still and motion productions with clients. Manage pre-production, logistics coordinating, permitting and prop design. Direct crew and talent during production. Coordinate with production team to ensure the creative direction is being followed. Adapt to changing conditions and challenges while maintaining a positive attitude. Manage post production of still images and editing of narrative and documentary film. Clients include Microsoft, Tesla Motors, Specialized Bicycles, Mt Baker, Schmidt Ocean Institute, National Oceanic and Atmospheric Administration, Hinge Crossfit.

UX Designer

Root Produktions, Inc

2016 - Present

Drive creation and evaluate user requirements with internal and external clients. Analyze existing data to determine current strengths and weaknesses. Develop and present wireframes, sitemaps and flow diagrams to stakeholders for review and feedback. Guide development of design guidelines and patterns. Collaborate with development and design teams to ensure smooth handoffs. Clients include SOG Knives, Fisheries Supply, Hydroflask, Simms, Hammerquist and Mercutio.

Technical Consultant, UX Design & Web Development

Root Produktions, Inc / Specialized Bicycle Components

2009 - 2016

Developed full stack MVC website and mobile applications . Designed and presented use cases, wireframes, flow diagrams and design specifications. Created and managed information architecture with internal teams and external agency partners. Designed and supervised three complete website builds. Maintained deliverables releases to internal teams and external customers across 31 countries and 15 languages.

Web Developer

3Tier Consulting

2008 - 2009

Developed MVC web applications for renewable energy forecasting. Facilitated weekly deployment of software updates. Ingested client feedback into development cycles. Collaborated with Product Management to introduce new tools. Developed UX guidelines for existing and future tools. Capitalized on web analytics to refine client facing tools.

Research Scientist II

Joint Institute for the Study of Atmosphere and Ocean

2001 - 2008

Developed near real-time software linking warning centers with USGS global seismic network with Java. Managed sigma-layer based ocean model runs in a parallel UNIX computing environment. Refined ocean model in FORTRAN. Analyzed in-situ and remotely sensed data for El Nino forecasting model.
