## Production Management

### Experience

My experience ranges in many ways, but I have always focused on ensuring that the project at hand is being made properly and professionally. From owning and managing a production company to running crews ranging from small to large, I know ultimately my true skill set lies in working with people. In my experience in the industry over the last 10 years, I have learned that production management hinges on building a trusting relationship with your teammates and working together to accomplish your goals.
